Click on the link of the user manual you need and it will download. The Camera Police is a good policy to help train your personnel. The camera component defines a bare bones perspective or orthographic camera that provides a view and projection matrix to the render script. A perspective camera is typically used for 3D games while an orthographic camera is used for 2D games. If you need advanced features like chasing, zooming, shake etc you will need to implement it yourself see section on thirdparty camera solutions below. This setting is ignored if Auto Aspect Ratio is set. The wider the field of view, the more the camera will see. Note that the current default value 45 is misleading. The camera component will automatically send an updated view matrix based on the current zposition of the camera. This is well

suited for 3D games.

For 2D games, it is often desirable to render the scene with orthographic projection. This means that the view of the camera is no longer dictated by a frustum, but by a box. Orthographic projection is unrealistic in that it does not alter the size of objects based on their distance. An object 1000 units away will render at the same size as an object right in front of the camera. The default render script supports three orthographic projections; Stretch, Fixed and Fixed Fit. You select which one to use by sending a message to the render script. The near and far planes set on the camera properties are only used for the perspective projection. You tell the render script to use the projection coming from the camera by sending a message to the render script. They are available from the Defold community assets portal. Please let us know on GitHub! You can find the item number on the product label or lasered onto the product itself. Subscribe to our newsletter! By delivering the best quality CCTV products at THE most reasonable price, Domar has benefited hundreds of thousands of customers in the UK and across Europe. For the past 10 years, Domar has earned itself a high reputation in the CCTV industry. File size is large and may take time to load. Log in or create a new account with a new user ID, email address and password, then choose the "Cameras" menu to "Activate Data Plan". We have provided or sent you a new SIM card for activation. Input the 20 digit ICCID number. You will not be able to transfer a used SIM card.

You must use the SIM card that came with your camera or was sent to you from JAGER PRO. Check the box to register your camera warranty then "Add Subscription to Cart". Ensure your camera is displayed in the Shopping Cart. You may add additional subscriptions before proceeding to checkout. Fill out your billing information and double check your order. Fill out the credit card information, then read the terms and conditions. Check the box then proceed to checkout. You will receive a confirmation email for your order. This process can take from 10 minutes up to 24 hours during normal business hours. Hover over "Cameras" and click on "Manuals and Videos". Select "4G Cameras" then choose the "Operations Manual" tab to "View and Print.pdf". Watch the camera "Operations Video" then set up your camera to the appropriate settings following the "Operations Manual" instructions. Read the privacy policy and terms of use then check on "I agree to these terms". Enter your information then confirm your registration. Once you click "Register" you should receive another confirmation email. Once you confirm your email, sign in and it will take you to the "Add New Camera" page. This is very important if you are using multiple cameras in the field. Watch the video located to the right to "Locate your Module ID" and "Register your Camera" to receive the registration code. Check the box after reading the "Terms of Use and Privacy Policy" then click "Add this Camera". Review the camera settings, at a minimum, change the Trigger Interval from 30s to 2m. Update your Camera Time Zone. Change Real Time Control to Yes. Input the camera phone number from the activation email. Once complete, click on "Schedule a Settings Update". Ensure you send a test photo. Press "MENU" until you are at the live preview screen with your carrier at the top. Press "OK" to take a photo and "OK" again to send the photo. Once the photo is sent, turn your camera "ON" to complete the syncing process.

Refresh your screen on your computer or mobile device. A new photo should appear with the code "JAGER PRO E" at the bottom of the photo. If your signal and battery icon are blank, request a status report. The top menu will have "Your Account ID". Below is the camera name "Description" with 2 columns, "Admin Access Code" and "Guest Access Code". Type in an Admin Access Code for your device. If you want someone else to view photos but not have control of the camera, set up a

“Guest Access Code” for them. You can give all your cameras the same access code or use a separate access code for each camera in case you have to delete one at a later time or to give someone access to only one camera. Input your email address or phone number to receive texted photos, click on Get Help for more information. Choose which camera you want to update then check the box for each email address or phone number to send to. The last option is “Other Delivery Options”. Enter the email address or phone number you want to receive the daily status report. Once complete, click on the “Update” button. Click on “Camera Management”. We are waiting for the camera to send the motion activated photo and to retrieve camera settings. Wait 30 seconds then click on “Refresh”. The new photo will have an “M” at the bottom of the picture. This will tell the camera to take a photo. Wait 30 seconds then click on refresh. The new photo will have an “S” at the bottom of the picture. You should now have a new photo with an S in the bottom of the picture. Clicking on any of your photos will bring up the photo gallery. Clicking on any picture will open up a large image.
