Nesta parte do manual, voce tambem encontrara informacoes sobre assistencia tecnica autorizada Canon EOS 10D bem como sobre a manutencao do dispositivo de modo a nao perder a garantia do produto Use as instrucoes do fabricante Canon EOS 10D para arrancar o produto corretamente, sem risco desnecessario de danos

ao equipamento. Voce tambem sera capaz de descobrir quais partes opcionais ou acessorios do Canon EOS 10D pode encontrar e comprar. <http://wekeepyoung.com/UserFiles/dect-uniden-manual.xml>

Esta e uma parte muito util do manual voce vai economizar muito tempo para encontrar uma solucao. 90% problemas com Canon EOS 10D sao repetidos para um certo numero de utilizadores. Leia para otimizar a utilizacao do Canon EOS 10D e nao consumir mais recursos do que e necessario para o bom funcionamento do produto. Voce vai aprender quais recursos adicionais podem ajudalo no gozo do Canon EOS 10D e quais funcoes do seu dispositivo sao otimizadas para realizar atividades especificas Deve familiarizar-se com ele, a fim de evitar a decepcao resultante de um periodo mais curto do desempenho esperado do produto Canon EOS 10D. No entanto, se voce nao pode se convencer a recolher manuais de usuario em sua casa, o nosso site ira fornecer-lhe ajuda voce deve encontrar aqui o manual da maioria dos seus dispositivos, incluindo Canon EOS 10D. EOS M and EOS R Full Frame mirrorless ranges deliver the power of DSLR in the body of a compact camera. Register your product and opt in for exclusive offers and discounts. EOS M and EOS R Full Frame mirrorless ranges deliver the power of DSLR in the body of a compact camera. Register your product and opt in for exclusive offers and discounts. Got a 10D photo youre particularly proud of. See more But it was only recently that I realised one specific. I want to finally buy a prime l. Im new to dSLR cameras, and now have a used 10d as. I took a picture with it and it seems like its a really slow shutter speed, which doesnt make sense to me. I need to take pictures at my daughters basketball game and dont want them blurry. TIA! But you will need to go to the highest ISO setting you have which, if I remember correctly on a 10D, is 1600. Unfortunately the 10D isnt too good at high ISO and your going to get somewhat noisy pictures. But better a little noisy than no photos. Next set your fastest lens that you have to wide open and get the fastest shutter speed you can. What kind of lenses do you have.

Set your AF mode to AI Servo and use your center focus point. The lens Ill be using is a Tamron AF Aspherical XR LD 28300mm 1:3.56.3 macro. It is compatible with all Canon EF lenses and designed for quick and easy shooting at any time. It is full featured for all types of shooting, from fully automatic snap shooting to highly creative work. Please purchase it separately. CF cards made by Canon are recommended. This digital camera supports Exif 2.2 also called "Exif Print". Exif Print is a standard for enhancing the communication between digital cameras and printers. Set the camera's main switch to the OFF position and remove the camera battery or unplug the power cord from the electrical outlet immediately.

Please consult your camera distributor or the closest Canon Customer Support. Handling it with wet hands may lead to electrical shock. When unplugging the cord, ensure that you hold the rigid portion of the plug. Pulling the flexible portion of the cord may damage or expose the wire and insulation, creating the potential for fires or electrical shocks. Exposure to intense sunlight and heat may cause the batteries to leak, overheat or explode, resulting in fire, burns or other injuries. If the camera gets wet, take it to your nearest Canon dealer as soon as possible. If small amounts of water splash onto the camera, wipe it with a clean dry cloth. If the camera is exposed to salty air, wipe it thoroughly with a slightly damp cloth. Otherwise, you may be unable to record or play back images. Recharge the battery. Load the battery. Connect the power cord to the battery. Open the battery compartment cover, then attach the battery. When cover and slide the battery pack the charge lamp stops blinking and into position until it locks into place. Set the focus mode switch on the lens to Align the red dots on the lens and camera and turn the lens in the. Before You Start Attaching the Strap Pass the end of the strap through the strap mount from beneath, then back in and out of the strap clasp as shown. This may lead to excessive battery discharge and a shorter battery service life. Insert the battery into the camera. Then you do not have to worry about exhausting the battery while using the camera. Set to this position when not using the camera. There are two ways to operate the electronic dial as described below. While looking at the LCD monitor, press the button on the back of the camera and turn the. To turn off the menu, press the button again. In these modes, all you do is point and shoot.

In addition, to help prevent mistakes caused by operating the camera improperly, the The Canon EOS 10D can capture subjects at any of seven AF points, so that anybody can take great shots easily. Focus tracking will then continue with any of the seven AF points covering the subject. Settings for Shooting For Basic Zone modes, only the image recording quality except, file. To extract the JPEG image embedded in the RAW image file, you will need the dedicated software. Therefore, a high ISO speed is suited for moving subjects or shooting in lowlight conditions. However, the image will contain more noise to make it look coarse or grainy. For shaded areas outdoors. Approx. 7000 K For cloudy or hazy days and during sunsets. Approx. By selecting this image, you import its white balance data for the white balance setting. This is called white balance bracketing. White balance bracketing will not work if the image recording quality is You can register and save up to three sets of processing parameters. The camera is compatible with the sRGB and Adobe RGB color spaces. Selecting sRGB For normal shooting, set sRGB for the color space. The folders are numbered from 100 to 999 and saved in the CF card. By selecting the optimum AF point, autofocus can be executed while you maintain the desired subject framing. You can also set the AF mode to suit the subject or intended effect. The camera has three AF modes 1. One Shot AF for still subjects, 2. AI Servo AF for moving subjects, and 3. AI Focus AF that switches automatically from OneShot AF to AI Servo AF if the subject starts to move. Set the lens focus mode switch to The AF point which achieved focus will flash briefly and the focus confirmation light in the viewfinder will light at the

same time. In the Basic Zone modes and mode, AF point selection will be automatic. In the modes, AF point selection can be set to either automatic or manual.

You can register an off center AF point which suits your preferred framing or automatic selection for the shooting moment priority. Any of the seven AF points can be registered. Only one AF point can be registered. For the drive mode, single frame, continuous, and self timer are provided. Select the mode which best suits the subject or your creative intentions. Metering mode Evaluative metering Partial metering Centerweighted average metering Drive mode Single frame Continuous. The Basic Zone uses evaluative metering. In the Creative zone, any of the three modes can be selected. Press the button. Select a metering mode. The viewfinder is divided into 35 metering zones to which all the AF points are linked for evaluative metering. After detecting the main subject's position, brightness, background, front and back lighting conditions, camera orientation horizontal or vertical, etc., the camera sets the proper exposure. The selftimer lamp will start blinking and the beeper will sound to indicate that the selftimer is operating. After about 10 sec., the image will be captured. During the first 8 sec., the lamp blinks and the beeper beeps slowly. The camera automatically sets the shutter speed and aperture value to suit the scene's brightness. Although the image can be captured, it may come out too bright or too dark. This is called ShutterPriority AE. A fast shutter speed can freeze the motion of a fastmoving subject and a slow shutter speed can blur the subject to give the impression of motion. This effect is ideal for portraits. To determine the exposure, refer to the exposure level indicator in the viewfinder or use a handheld exposure meter. It is effective for group photos and landscapes. The camera uses the seven AF points to detect the nearest and farthest subjects to be in focus. You can make the image look lighter increased exposure or darker decreased exposure.

Turn the Mode Dial to any Creative Zone mode except In the mode, AEB is executed by changing both the shutter speed and aperture. In the After locking the exposure, you can recompose the shot while maintaining the desired exposure level. This feature is useful for backlit and spotlighted subjects. AE lock works differently depending on the selected AF point and metering mode. Bulb is useful when a long exposure is necessary for capturing night scenes, fireworks, the night sky, etc. Set the Mode Dial to. To set this Custom Function, see "Setting a Custom Function" on page 145. When mirror lockup is set, the camera operates as follows. The procedure is as easy as a normal AE shot. This chapter explains how to take flash shots with the builtin flash and EOSdedicated Speedlite 550EX. In the aperturepriority AE mode, a slow sync speed is set automatically in lowlight situations to obtain a naturallooking, balanced exposure between the subject and background. The shutter speed and aperture value are determined automatically, just as in. Other wise the lens barrel may partially obstruct the flash coverage and cause part of the image to look dark. The camera's redeye reduction feature turns on the redeye reduction lamp to shine a gentle light into the subject's eyes to narrow the pupil diameter or iris. FE Lock is a function in the Creative zone. Flash exposure compensation works in Creative Zone modes. Regarding the operation of the 550EX, refer to the Speedlite's instructions. Set the Mode Dial to. MODE SELE PILOT Make sure the Speedlite 550EX's pilot. The flash output is changed for the three shots while the background exposure remains the same. Flash Exposure Compensation For flash shots with flash exposure compensation, see "Flash Exposure Compensation" for the builtin flash.

Image Playback When attempting to playback images not taken with the camera The camera might not be able to properly display images captured with a different camera or edited with a personal computer for image processing or changing the file name. Besides selecting and viewing a single image, you can view the image with shooting information, an index of thumbnails, and a magnified view. You can also rotate the image and jump to an image far ahead or back. Single Image Image with shooting information Index display. Set jump display. Each image is displayed for approximately 3 seconds. This allows you to play images with the correct orientation. Always turn off the camera and

the television before connecting or disconnecting them. Open the cover. Connect the cable. Erasing a Single Image Set the camera for playback. In such a case, format the CF card with the camera first. All direct printing operations can be done with the camera. You control the printing operation with the camera buttons. This is called direct printing. To BJ printer Follow steps in "Connecting to a Card Photo Printer". The printing will stop. When Stopping the Printing With a card photo printer If only one print is being printed, you cannot stop the printing. This feature is very convenient when you make prints with a DPOF compatible printer or printing lab. DPOF Digital Print Order Format DPOF DPOF Digital Print Order Format is a standard used to record on the CF. Then those images can be printed with a DPOF compatible printer or printing lab as you have specified. Printers capable of direct printing from the camera can also print the images as specified by DPOF. Order the prints from the Just insert the camera. Print Type Index The images are made smaller to be printed as index images on the paper. Both Prints both the standard and index prints. The print will not have a date imprinted. Exit the set up screen. The printing will stop. Especially settings for shooting are called Custom Functions C.Fn.

mark you see in this Instructions gives just a brief description of the respective Custom Function. This chapter explains the menu settings and Custom Functions in detail. For setting the color temperature directly to match the color temperature detected by any handheld color temperature meter. Information on new firmware and firmware updates are provided at Canon's Web site. This prevents the AF from being thrown off. Automatic AF point selection can also be registered as the home position. Center AF point Automatic selection Bottom. Maintenance. The date and time are recorded with the image file for each captured image. Note that the image sensor is a very delicate component. If possible, you should have it cleaned by a Canon Service Center. The camera will turn off and the shutter will close. It covers basic shooting concepts, camera specifications, system accessories, and other reference information. Reference. Abbreviation for auto focus. It enables the camera to focus the subject automatically. CF CompactFlash card CF card is the small, cardshaped storage media used to record images taken by the EOS 10D. It is equal to the focal length divided by the aperture diameter. It adjusts the amount of light striking the CMOS sensor. The aperture value is displayed on the camera's LCD panel and in the viewfinder. The subject is too 2 Attach a neutral density filter bright. In addition, ". Message Description Busy The camera is either processing the data or writing the captured image onto the CF card. Wait until it is finished. Loading image. The camera is reading the image in the CF card. Wait until it is finished. Turn off the camera After cleaning the image sensor, turn the switch to. The image was captured by another camera or in an incompatible format. Or the image has been edited with a personal computer. Have the waste ink tank replaced by your dealer or service center see the list that came with the BJ printer at your earliest convenience.

Printer error Turn off the printer and turn it back on. Jot down the "xx" error code and take your camera to the nearest Canon Service Center see list of service centers on the back cover. Contact your dealer or Canon Service Center. The image is out The lens focus mode switch is set to or. The rated voltage is 7.4 V. Rechargeable with Battery Charger CB5L. CF Card Data storage device where the captured images are recorded. CF cards made by Canon are recommended. PC Card Adapter Enables a CF card to be inserted into a PC card slot of a.
